

Comprehensive Behavioral Health Model Outcomes

CBHM is a comprehensive model that integrates a **Multi-Tiered System of Supports (MTSS)** and services within a school according to **student needs**, while also recognizing **family and community partnerships** as an integral part of a school's success.

Impact on student outcomes:

Dr. John Hattie is a researcher who uses this dial to convey how much impact different things have on student learning. CBHM evaluation data reveals significant improvement in student outcomes, including in the following areas:
