ABOUT US

The Behavioral Health Services (BHS) Department **provides comprehensive services** through the NASP Practice Model and has received the NASP ESPS Award. We have trained students from pre-practicum through internship for over 15 years. Many of our current staff began working with the nationally recognized department as school psychology students themselves.

In 2020, we welcomed our first class of pre-doctoral interns to a specially designed training program that meets criteria for both certification through the Massachusetts Department of Education in School Psychology and licensure as an independently practicing psychologist through the Board of Registration of Psychologists for the Commonwealth of Massachusetts as Health Service Providers.

The Behavioral Health Services Department of BPS has received **Exemplary Recognition** from the **National Association of School Psychologists (NASP)** for outstanding school psychological services, demonstrating commitment to comprehensive student support and best practices.
